ABOUT US

We safeguard and enhance green spaces through expert management of trees and habitats, delivering personable service that creates lasting environmental and economic value.

OUR MISSION

To establish Woodworx Group brands as the trusted authority in arboriculture, tree consultancy and ecology, combining technical excellence with genuine relationships to set new industry standards.

OUR VALUES

INTEGRITY

We deliver on promises, making trust the foundation of every relationship.

RESPECT

For our clients, our environment, and the legacy we leave behind.

PASSION

Bringing enthusiasm and care to every project, no matter the scale.

EXPERTISE

Continuously refining our knowledge to solve tomorrow's challenges.

DIVERSITY

Embracing different perspectives to strengthen our teams and solutions.

OUR BRANDS

Climbers Way Tree Care

Professional tree surgery for domestic and commercial clients across the South and South West of England. From precision pruning to large-scale removals, we combine technical skill with an ethical approach to tree management.

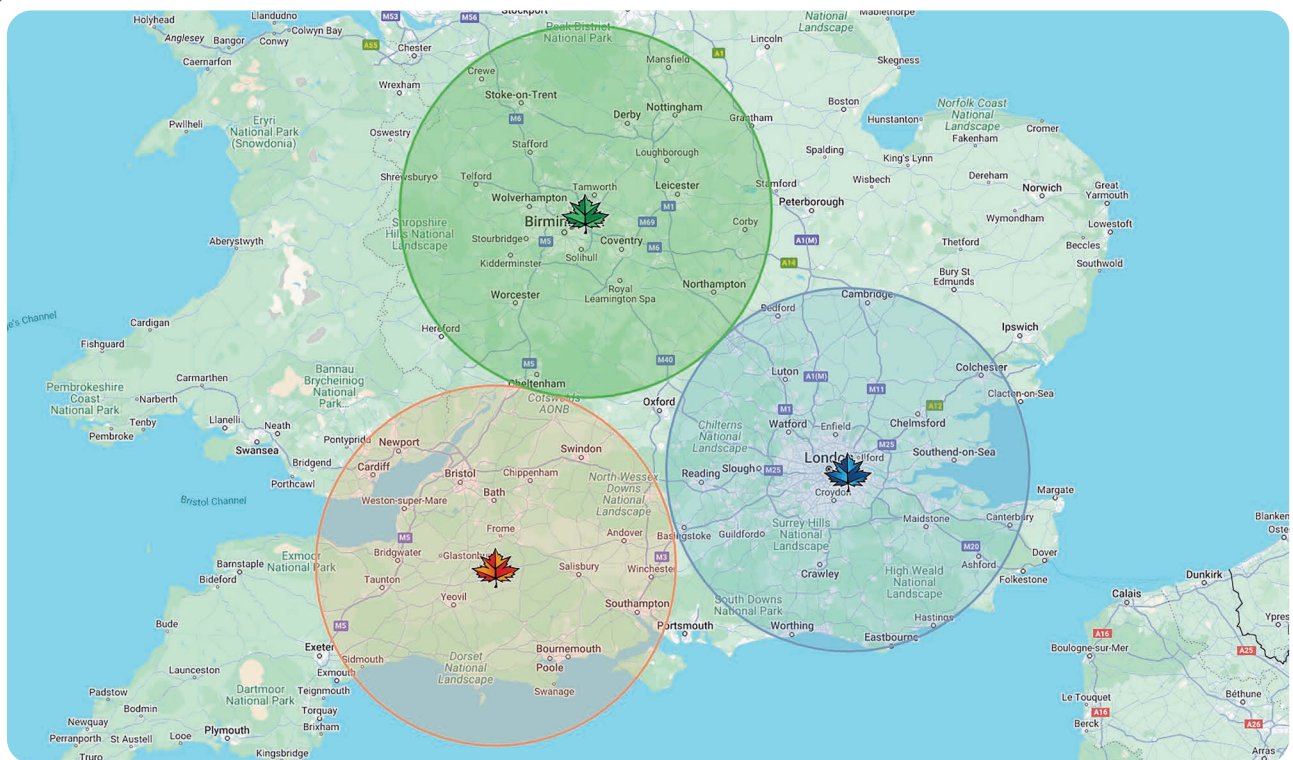

Dryad Tree Specialists

Arboricultural contractors and consultants working across London, Surrey and the Midlands. We support developers, landowners, and local authorities with arboricultural works, expert tree surveys, and veteran tree care.

New Leaf Environmental

Our team of ecologists conduct protected species surveys, specialist tree reports, habitat assessments, and deliver practical strategies for nature-based solutions and planning compliance.

OUR SERVICES

GREEN ASSET MANAGEMENT

Maximising the health and value of your natural assets.

TREE SURGERY & VEGETATION MANAGEMENT

Expert intervention enhancing safety, aesthetics, and tree health.

TREE CONSULTANCY & SURVEYING

Accurate, actionable insight to support planning and protect trees.

GROUND MAINTENANCE

Reliable, year-round upkeep for clean, professional outdoor spaces.

ECOLOGY

Practical ecological support that balances development and biodiversity.

WOODLAND MANAGEMENT

Sustainable strategies to preserve, restore, and future-proof your woodland.

TRAINING

Industry-led training that builds skill, safety, and confidence.

PRODUCTS

Woodchip, logs, and timber—nothing goes to waste.

GREEN ASSET MANAGEMENT

We help organisations take full control of their trees, hedgerows, woodlands, and wider green infrastructure—ensuring they remain safe, compliant, and strategically managed for the long term. From highways to housing estates, schools to public land, we deliver data-led strategies that reduce risk, meet legal duties, and support biodiversity. With arboriculture, ecology, surveying, and groundwork in-house, we offer a joined-up service from a single trusted provider.

We begin by surveying your trees and vegetation with detailed assessments and GIS mapping, then create a proactive plan to prioritise, schedule, and maintain your assets to the right standard.

Whether you're managing land for public safety, planning future development, or trying to improve your environmental performance, we'll help you achieve your goals in a way that's practical, cost-effective, and environmentally sound.

ASSET MAPPING

Identify and record all tree stock with GIS-integrated surveys

RISK MANAGEMENT

Proactive planning to reduce liability and ensure public safety

STRATEGIC PLANNING

Develop long-term plans tailored to your site and objectives

INTEGRATED SERVICES

Combine arboriculture, ecology, and maintenance under one contract

TREE SURGERY & VEGETATION MANAGEMENT

We provide comprehensive tree care, ensuring that trees are safe, healthy, and visually appealing, whether in a park, along a highway, or within a commercial premises. We offer expert arboriculture tailored to each sector's unique needs. Each step of our comprehensive service, from initial contact through to customer care, is designed to ensure a smooth and professional experience for businesses, local authorities, educational institutions and all others who require commercial tree services.

From crown reductions and deadwood removal to complete tree felling and site clearances, we select appropriate techniques based on tree species, condition, and site constraints. Our services extend beyond trees to comprehensive vegetation management, tackling invasive species control, hedge maintenance, and habitat improvement works. Emergency response teams stand ready to address storm damage or dangerous trees, providing 24-hour coverage for critical situations.

TREE REMOVAL

Safe, controlled removal of hazardous or unwanted trees

CLEARANCE & FORESTRY

Efficient large-scale vegetation clearance

TREE PRUNING

Targeted pruning to improve tree structure, safety, and appearance

TREE CARE

Ongoing maintenance to support tree health and vitality

TREE CONSULTANCY & SURVEYING

We provide clear, expert guidance to help you manage trees safely, legally, and sustainably. From risk assessments to planning reports, our consultancy services support informed decisions and unlock development potential—while protecting your green assets. Whether you're managing a single tree or hundreds across a large estate, our surveys are tailored to your site, goals, and legal obligations. We identify hazards, assess condition, and recommend management actions grounded in arboricultural best practice.

For planning applications, we deliver BS5837:2012-compliant tree surveys that local authorities can rely on. These reports support smooth approvals, outlining which trees can be retained, removed, or protected during construction. We also use the latest tools for internal decay detection and advanced climbing inspections—giving you detailed, high-up assessments that ground-level surveys can't provide. With follow-up support built in, we help you stay ahead of risk and regulation.

GROUND-BASED

Detailed inspections from the ground to assess tree health, structure, and risk.

AERIAL

In-depth crown inspections carried out by qualified climbers for hard-to-reach assessments.

GROUPS MAINTENANCE

We keep outdoor spaces safe, tidy, and presentable all year round. From schools and business parks to housing estates and public land, our grounds maintenance teams deliver dependable results with minimal disruption.

Every site gets a tailored schedule built around your priorities—whether that's keeping grass short, hedges neat, or pathways clear. Our operatives are trained, uniformed, and equipped to handle jobs of any scale, from routine visits to seasonal makeovers.

We work with councils, developers, facilities managers, and estate teams who need consistent standards and clear reporting. Health and safety is built into every visit, and we carry the accreditations and insurance to back it up.

As part of a wider group, we can also bring in arboriculture and ecology expertise when needed—so you get a complete, joined-up service from one trusted provider.

OUR SERVICES INCLUDE

- Grass cutting, strimming, and verge control
- Hedge trimming and shrub pruning
- Litter picking and site clearance
- Tailored maintenance plans for every season

ECOLOGY

We provide expert ecological support to help clients meet their legal obligations, protect biodiversity, and move projects forward. Our ecologists work alongside planners, developers, and land managers to assess, advise, and deliver practical solutions that balance progress with nature. Whether you need a Preliminary Ecological Appraisal (PEA), protected species surveys, or a Biodiversity Net Gain plan, we'll guide you through each stage. We work fast, communicate clearly, and stay aligned with planning policy and UK environmental legislation.

From greenfield development sites to long-established estates, we help you understand your site's ecological value and manage it responsibly. Our services go beyond box-ticking—we provide actionable insights and pragmatic advice that supports decision-making on the ground.

With in-house arboriculture, surveying, and land management teams, we can deliver joined-up services that reduce delays and simplify procurement.

SURVEYS

Preliminary Ecological Appraisals and habitat

ADVICE

Protected species surveys and mitigation advice

MONITORING

Biodiversity Net Gain planning and monitoring

REPORTING

Integrated ecology and arboriculture reporting

WOODLAND MANAGEMENT

We help landowners, estates, and local authorities care for woodlands with long-term vision and practical action. Whether you're preserving ancient woodland or restoring neglected sites, our management plans bring structure, compliance, and ecological value to every project. Our experienced teams handle everything from selective thinning and invasive species control to habitat creation and replanting.

We also support grant applications, felling licences, and compliance with UK Forestry Standards. With in-house ecologists and arboricultural consultants, we can assess both ecological impact and tree health in a single visit—saving time and streamlining reports.

Our goal is simple: to help woodlands thrive while meeting your operational, environmental, and legal needs.

OUR SERVICES INCLUDE

- Woodland surveys and management plan
- Selective felling, thinning and coppicing
- Invasive species and pest control
- Habitat enhancement and replanting schemes

TRAINING

We deliver practical arboriculture training that builds confidence, competence, and a strong safety culture. Designed for local authorities, land managers, contractors, and estate teams, our courses are led by seasoned professionals who know what works in the field. Whether you're upskilling your in-house team or starting from scratch, we tailor our training to match your environment, equipment, and goals. From chainsaw use and tree inspection to aerial rescue and ground operations, we teach the skills that keep sites safe and projects moving.

All courses are delivered to industry-recognised standards, with a strong focus on risk awareness, legal compliance, and hands-on learning. Our instructors bring real-world arboricultural experience—and the ability to engage teams at every level.

Our goal is to grow a safer, more skilled workforce for the future of arboriculture. Whether it's new recruits or experienced operatives, we help teams build lasting expertise they can rely on in the real world.

TRAINING INCLUDES

- Tree Climbing Operations
- Chainsaw Operations
- Machinery Operations
- Refresher Training
- Tree Knowledge
- First Aid

PRODUCTS

As part of our sustainable approach to arboriculture, we supply high-quality woodchip, logs, timber, and biomass fuel. Nearly all green waste is recycled. All timber is sorted, processed, and repurposed locally, supporting circular economy principles and reducing environmental impact. Our woodchip is ideal for landscaping, surfacing, or biomass energy, while our seasoned logs and larger timber are available for a range of uses, from fuel to furniture.

We can supply in bulk, with flexible delivery schedules and consistent quality across every load. We work with landscapers, biomass suppliers, local authorities, and private clients—anyone who wants a sustainable source of natural materials with traceable origins.

Because our products are a by-product of our arboricultural work, you're getting materials that are both cost-effective and carbon-conscious.

WOODCHIP & MULCH

For landscaping, surfacing, and soil protection

BIOMASS FUEL

Screened woodchip for commercial energy systems

FIREWOOD & LOGS

Hardwood logs for heating use

TIMBER

For milling, habitat, or crafts

ENVIRONMENTAL, SOCIAL AND GOVERNANCE

ENVIRONMENTAL AND SOCIAL

We measure our carbon footprint across all operations and implement reduction strategies through electric vehicles, battery-powered equipment, and waste recycling programs. Our ISO 14001 accreditation demonstrates our systematic approach to environmental management. Our teams operate to strict environmental protocols, including bio-security measures that prevent the spread of invasive species and pollution controls that safeguard air, water, and soil.

SOCIAL

We prioritise the wellbeing of our people and the communities we serve. We invest in continuous training, mental health support, and safe working practices. As an equal opportunities employer, we celebrate diversity and inclusion while actively engaging with local schools and charities to promote green careers.

GOVERNANCE

Governance at Woodworx Group is driven by integrity and accountability. Our comprehensive insurance coverage and regular third-party audits ensure transparent operations. We maintain robust audit trails, health and safety certifications, and membership with leading professional bodies including the Arboricultural Association.

ACCREDITATIONS AND MEMBERSHIPS

ISO STANDARDS

We're certified to ISO 9001 for quality, ISO 14001 for environmental care, and ISO 45001 for health and safety. These standards guide every task we take on, helping us raise the bar and outperform expectations each time.

ISO9001
